

CONCRETE TROUGHS

SPECIFICATION SHEET

Our precast concrete water troughs are finished to an extremely high standard. Troughs have rounded internal corners giving them extra strength.

All our precast concrete water troughs are reinforced with both steel and fibre for added strength and durability. These concrete water troughs have large drainage bungs which facilitates fast and efficient draining and cleaning. Our troughs do not have inner dividing walls which can cause debris build up and reduces capacity. Clean water is essential for the health of stock.

All our troughs can be supplied with a full flow valve - $\frac{3}{4}$ inch or $\frac{1}{2}$ inch and also can be supplied with a high-pressure valve. Even when empty, our concrete water troughs are extremely stable. Concrete water troughs do not distort over time. For easier installation, our larger troughs come with lifting points.

RANGE SPECIFICATIONS

Description	Capacity	Dimensions	Weight	Code
Top Fill Troughs	20 gallons	812.8mm (32") long x 609.6mm (24") wide x 381mm (15") high	210kg	WTTF20
	40 gallons	1498.6mm (59") long x 609.8mm (24") wide x 381mm (15") high	333kg	WTTF40
	75 gallons	1854.2mm (73") long x 736mm (29") wide x 444.5mm (17.5") high	475kg	WTTF75
	150 gallons	1930.4mm (76") long x 914.4mm (36") wide x 622mm (24.5") high	890kg	WTTF150
	225 gallons	2133.6mm (84") long x 1117.6mm (44") wide x 685.6mm (27") high	1180kg	WTTF225
	300 gallons	2286mm (90") long x 1270mm (50") wide x 730.25mm (28.75") high	1400kg	WTTF300
	400 gallons	2921mm (115") long x 1270mm (50") wide x 730.25mm (28.75") high	1750kg	WTTF400
In House Drinkers	70 gallons	2011.68mm (79") long x 609.8mm (24") wide x 800.1mm (31.5") high		WT8110
	140 gallons	3992.88mm (157") long x 609.8mm (24") wide x 800.1mm (31.5") high		WT8120
Trough Supports		460mm (19") wide		WTS10
		600mm (23.6") wide		WTS20
Low Wide Feed Troughs		610mm (24") wide		WT8130
		864mm (34") wide		WT8140
